Our Story

Rhodes Technologies has been established to help businesses with their IT infrastructures and digital marketing solutions. We are a single point of contact; we offer all the IT and digital marketing services an organization might need.

- Our technicians are experts in their respective fields and have several years of experience working in the IT sector. We have the expertise, resources and workforce to provide the hardware, software and enterprise resource planning (ERP) management systems to ensure that your organization is on the cutting edge of technology.
- We are always evolving and adapting to the new and modern technologies available on the market. This enables us to find the best IT solutions according to the specific requirements of our clients, not only for the short term, but also for the future.

Our Values

Integrity, Open Communication, Total Client Satisfaction, Involved.

“ Advantage

We take pride in being the youngest company to achieve the Microsoft Silver competency which showcases our expertise in the field of Microsoft services. Our intention is not to work with you as an IT services supplier but as your IT partner and guide you on the journey of a world-class cloud-based solution and other collaboration tools.

ERP Solutions

Odoo Solutions

Artificial Intelligence

Artificial Intelligence

Just like artificial intelligence (AI) is becoming a cornerstone of digital businesses, intelligent automation is transforming the world of automation. More specifically, Intelligent Process Automation (IPA) is the art of applying AI technology to your everyday processes to bolster productivity, enhance efficiency, and bring your business into the 21st century and beyond.

Robotic Process Automation (RPA)
